

Housing cost burden: Vermont

- An estimated 88,000 Vermont households spend more than 30% of their income for housing. This threshold is the level at which housing expenses are no longer likely affordable for the average household, indicating a state of “cost burden.”
- Cost-burdened households comprise 34% of all Vermont households that live here year-round.
- Nearly 39,000 households statewide pay more than **half** of their income for housing, leaving few funds for other necessities such as food. These households are at high risk of eviction, foreclosure and homelessness.
- Vermont’s renters are more likely than homeowners to be cost burdened. Half of all renter households in the state pay more than 30% of their income for housing.
